

PURfiberXP™

Moldable Cortical Fiber

X-link™

Robust network of 100% cortical fibers

Advanced bone matrix

Unique surface structure, malleable and flowable

Accelerated hydration

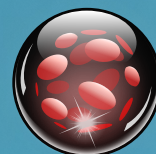

Rapid wicking capability

THE FUTURE OF REGENERATIVE MEDICINE™

PURfiberXP™

Moldable Cortical Fiber

PURfiberXP

X-link™ technology with a network of fibrous cortical structures, demonstrating a greater percentage of DBM content and native BMP-2 activity.

Why PURfiberXP

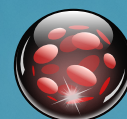

A carrier-free cortical matrix, containing a unique surface structure. Studies have shown active bone remodeling, while the pliable and responsive nature allows for easy shaping and manipulation.

Using PURfiberXP

A highly versatile bone graft solution capable of rapidly wicking various substances such as bone marrow aspirate (BMA), blood, platelet rich plasma (PRP), or saline, according to a clinician's medical judgement.

SIZE	Product Number
2.5cc	PURfiber-2.5
5cc	PURfiber-5
10cc	PURfiber-10
